Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the plurality of winding which are unbounded on two sides (claim 11) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 8, 10, 12 and 14 recite the limitation "said ground plane conductor". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in

Art Unit: 2817

section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

In light of the 35 USC 112 rejection, claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by Sasaki et al US Pat. 6,346,863.

Sasaki et al disclose a circuit comprising a signal layer (microstriplines 21 and 22) including at least one signal conductor, wherein the signal conductor is defined by a plurality of pathways of identical shape that extend in parallel relation to one another, wherein said plurality of pathways are positioned to electrically interact with each other, wherein one of the pathways is unbounded on one side by the others of said plurality of pathways, and wherein the spacing (g4) of said unbounded pathway to an adjoining one of said plurality of pathways is less than the spacing (d4) between the others of said plurality of pathways and a termination means (terminating resistor) for coupling electrical signals to said signal conductor. Inherently, the microstriplines will have a dielectric substrate and ground plane layer. (See figure 4 and column 1 lines 9-35)

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gunton et al US Pat. 4,027,254, Tsujiguchi US 2002/0196101 A1, Iida et al US 2002/0130733, Epstein US Pat 3,609,416, Taenzer US Pat. 4,452,084 and Talisa et al US Pat. 5,974,335.
